PROTECT YOURSELF WITH INSTANT HAND SANITIZER

WATCH OUT FOR VIRUSES & GERMS!

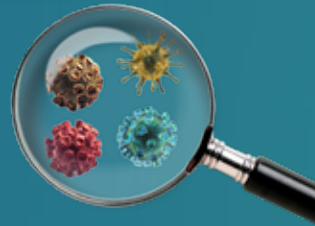

Just because you can't see them, doesn't mean they aren't there!

Specially designed formula kills 99.99% of germs in 15 seconds. Evaporates quickly, leaving no residual odor or color and can be used repeatedly without drying the skin. Meets OSHA's Bloodborne Pathogens standard. Alcohol-based handrubs significantly reduce the number of microorganisms on skin and substantially cut down on the spread of potentially lethal antibiotic-resistant bacteria. These products are fast acting and cause less skin irritation than antibacterial soaps.

Teachers, students, doctors, and healthcare personnel may be more inclined to use alcohol-based handrubs because they are more convenient to use.

HEALTH & LIVING

INTERNATIONAL GERMS ARE HERE

One way germs and viruses are spread is through international travel. These sicknesses are passed around extremely easy from person-to-person through coughing, sneezing, and talking! Consider these common sense tips to prevent you from catching the Flu this season.

- While sick, limit contact with others as much as possible to keep from infecting them.
- Avoid touching your eyes, nose and mouth. Germs spread this way.
- Clean and disinfect surfaces and objects that may be contaminated with germs like the flu.
- Cover your nose and mouth with a tissue when you cough or sneeze. Throw the tissue in the trash after you use it.
- Wash your hands often with soap and water. If soap and water are not available, use an alcohol-based hand sanitizer. (these tips and more are available at cdc.gov)

Pacific Breeze offers Instant Hand Sanitizer for your office, school, business, home, or institution!

HOME AND OUTDOOR LIVING

PREP YOUR YARD FOR SPRING

Here are some tips to help you keep your grass alive and to prevent extra work in the spring.

It is true; grass is less active in the winter and may even become dormant due to harsh weather conditions. If grass is left too long in winter it can become perfect homes to small rodents who burrow and build nests on it which will create dead spots.

Pick up leaves, branches, yard waste containers, lawn equipment, etc. off of the grass because if left for long periods of time it can kill the grass underneath causing more damage than the cold weather itself.

Shoveling walkways and keeping them clear of ice will prevent the urge to walk on your snow covered grass; this will reduce heavy foot traffic. Compacted dirt and soil on your lawn will damage and smother the grass.

If there is a need to keep where you shoveled clear of snow and ice, then sprinkle a "snow and ice melt" product in that area while still being careful not to get it on the grass. (Using sand will be less damaging if it does touch your lawn.)
