MAY GARDENING TIPS

If you are giving or are given potted roses for mothers day they can go straight into the ground this time of year. Be sure to dig a hole in the ground double the size of the pot they are in and use a good blend of soil and fertilizer.

A cleaner way to pick weeds is to wait until after it has rained because weeds break through wet soil easier.

Plant some vegetables that love warmer weather this month like tomatoes, cucumbers, carrots, cilantro, dill and corn. If you plant at various times you will have a variety of vegetables throughout the summer instead of one short harvest.

Once the flowers on plants have died be sure to cut them off but not the leaves.

If you plan on making your own organic compost do not include the following:

- Plants that are diseased
- Ivy or rhododendrons
- Dandelions or other weeds

Consider a raised garden bed next year if you are having a problem with slugs or small bugs that are happily “munching” on your vegetables. Also, raised garden beds allow you to move freely around the entire garden. Added bonus: raised beds are convenient if you have trouble getting up and down while gardening due to the height of them and are more comfortable if you build a sturdy lip to sit on while enjoying your garden.

FIT FOR SUMMER?

It is not too late to start your New Year's Resolution and to get fit for summer. Here are some tips to help you get back into the swing of things!

1. **Take it easy** - Don't go to the gym and over work yourself. If you haven't been working out regularly you are prone to injury (pulling muscles, twisting ankles, etc.) It is better to start out letting your body ease into it for a couple weeks rather than injuring yourself and being out for a month or more.

2. **Exercise and diet** - Working out and eating healthy go hand in hand. Working out without eating a balanced diet will not get you to your goal whether that is losing weight, toning up, or simply getting healthy. Try to minimize the amount of processed foods you eat and embrace the produce section of the grocery store. Save some time by prepping your meals for the week on the weekends to shorten or eliminate prep time.

3. **Not all machines are created equal** - Try using the free weights instead of the machines. Free weights allow you to choose your own path of movement. The machines aren't meant for everyones body type because if you are too short, too tall, your arms aren't long enough, etc., you run the risk of injuring yourself. You can use the dumbbells, medicine balls, and barbells to enhance your workout.

STAY ORGANIZED

Tips to get ready for spring and get organized to keep on track for 2021:

• Store cleaning supplies in a plastic tote instead of individually on the shelf, it will make it easier to carry from room to room (when the tote is not being used keep away from children.)

• Don't leave dinners up till the day of, prepare a list on Sunday, go shopping and prep so you are

ready for the week- this will eliminate stress after work and save money.

• When it's time to spring forward or fall back check on these items if they need attention also: smoke detector batteries, canned foods, medication, cosmetics, and freezer foods.

• Organize the pantry using magazine or office baskets to utilize space keeping like items together - don't forget labels are your friend.

JOKES OF THE MONTH

HA-HA-HAVE A LAUGH

Q: If April showers bring May flowers then what do May flowers bring? A: Pilgrims!

Q: What travels around the world and stays in a corner? A: A stamp.

Q: Why do golfers carry an extra pair of socks? A: In case they get a hole in one.

Q: Why do bananas use sunscreen? A: Because they peel.
